

ZA5000

intelligent walk through detection door

Product Features

- Intelligent identification: It can automatically identify and exclude daily necessities for mobile phone detection.
- Ultra-large screen display: It uses a 29-inch LCD screen to display various types of information intuitively and clearly.
- Multi-mode switching: mobile phone detection mode, knife and gun contraband mode, all-metal type, user-defined mode.
- Multi-zone alarm function: There are 18 zones on each side to warn the alarm position of the mobile phone.
- Wide-body door panel design: The shell is stable, sturdy, durable and does not deform.
- Automatic calibration: The device is equipped with an automatic calibration mode, which automatically calibrates according to the site during installation and shields interference.
- Signal graphics: The detection signal is graphically displayed in waveform, and the device status is clear at a glance.
- Windows system: Strong stability and wide range of expansion functions.

Basic parameters

- Dimensions (mm): 2420 (H) x 970 (W) x 650 (D)
- Channel size (mm): 1989 (H) x 720 (W) x 650 (D)
- Power supply: 220V
- Weight of the whole machine: 150kg
- Display screen: LG 29 inches
- Power consumption: <40W
- Protection level: IP54
- Parameter range of non-contact infrared temperature measurement (optional):
 - Thermal imaging probe 2 million visible light resolution 1920: +1080, the thermal imaging resolution 256 * 192
